

ACCESSORY

P200 Reducing Pilot

REF EFC-395 ISSUED 05 Jun 2026

SPECIFICATIONS

APPROVALS & CERTIFICATIONS

- ISO 9001

APPLICATIONS

- Pressure reducing valves
- PRV districts
- Zone pressure control

FEATURES

- The P200 reducing pilot is a spring-loaded pressure regulator that senses downstream pressure and modulates the main valve position to maintain the set pressure
- The set point is adjusted via an external spring compression screw
- Used on A200, A203 and A900 main valves configured for PRV duty
